

Khanh Duong

✉ dqkqdlot@gmail.com  [dqkqd](#)

Skills

- Programming: Rust (open-source contributions), Python (professional), JavaScript, Nix, Go, C/C++.
- Frameworks & Tools: Flask, Axum, Cypress, Nix, Docker.
- Languages: English (IELTS 7.5), Japanese (NAT-TEST N2), Vietnamese (Native).

Work Experience

FPT Japan

April 2023 - Present

Software Engineer Data Analytic Platform (Python, Flask, JavaScript)

- Led sprint refinements, planning, and reviews. Clarified user requirements and feedback, and supported daily communication with customers.
- Mentored junior engineers and assisted them through pair programming, code reviews.
- Re-architected the data storage layer and integrated an OLAP database for analytical workloads, achieving an 8x performance improvement.
- Built a fully automated end-to-end testing infrastructure, reducing production bugs and eliminating manual testing overhead.

Nissho Electronics

Aug 2020 - April 2023

Network Engineer

- Researched and resolved network connectivity and configuration on Juniper Networks devices.
- Developed internal Python libraries for network automation and integrated them into daily workflows, minimizing manual effort and human error.
- Delivered weekly training on Python and network automation across multiple departments.

Quality Assurance Engineer

- Contributed to the development and testing of applications on Web, Android, and iOS platforms.
- Designed and proposed automated testing strategies to reduce manual regression testing.

Education

VNUHCM - University of Information Technology

Hochiminh, Vietnam

B.Sc. in Computer Science. Honor Program.

Sep 2016 - Nov 2020

Open-Source Contributions

Apache Datafusion <https://github.com/apache/datafusion> (8.2k stars)

2025 - Present

- Pull Requests: Contributed pull requests fixing csv, dataframe schema, improving optimizer layer and benchmarks for Apache Datafusion - a SQL Query Engine.

Apache Arrow <https://github.com/apache/arrow-rs> (3.3k stars)

2025 - Present

- Pull Requests: Contributed pull requests improving data layout format, array view for Apache Arrow - a columnar memory format.

rust-analyzer <https://github.com/rust-lang/rust-analyzer> (15.3k stars)

2023 - 2024

- Pull Requests: Contributed pull requests improving postfix completion, code imports, and docs rendering for rust-analyzer - a compiler front-end for the Rust Programming Language.

Projects

- **zero2prod**: A production-ready backend service in Rust with axum following the book Zero To Production In Rust.
- **chip8**: A chip8 interpreter in Rust.
- **shooting-game**: A complete Entity Component System (ECS) from scratch in C++ with a platformer game on top of it.

Awards and Certifications

- AWS Certified Cloud Practitioner Jul 2024
- Juniper Network Associate (JNCIA) Dec 2022
- Finalist, 22nd annual Eureka Award research competition for Vietnamese students Nov 2020
- Finalist, AI Hochiminh city challenge Oct 2020
